

STAY ONE STEP AHEAD
HIAB HICONNECT FOR MOFFETT

EMPOWER YOUR FLEET, YOUR EQUIPMENT AND YOUR PEOPLE

As a fleet owner, you have to stay competitive in a tough marketplace. Yet you face a challenge in seeing the true performance of your truck mounted forklift units out in the field

Hiab HiConnect™ for MOFFETT is a Connected Service that keeps you one step ahead with next-generation intelligence. By enabling new insights, it helps you to further increase efficiency, productivity and safety.

With HiConnect for MOFFETT, you receive real-time data about the operation and condition of every truck mounted forklift in your fleet. The practical and simple web portal gives you an unprecedented level of control of your operations. Improve your performance and safety and avoid unnecessary downtime.

The value you get from HiConnect for MOFFETT

Improved performance

Understand how equipment has been used, where, what times and with what capacity.

- Increase uptime
- Improve productivity
- Optimize usage and utilization

Location control

With HiConnect for MOFFETT you always know where your units are in real time and where they have been. Thus you're in full control.

- Track each unit in real time
- Monitor driving routes and times
- Quickly recover the position of lost units

The free version of HiConnect for MOFFETT includes great features such as a live map of your units and information about upcoming service needs. The only thing you need to do to use it is register at www.hiab.com/hiconnect-registration

HiConnect Premium for MOFFETT gives you access to all equipment data, fleet overviews and complete performance functionality.

Control over maintenance needs

From one easily accessed place, see your equipment service history, upcoming services based on service plans and real-time service counters based on actual usage.

- Increase equipment lifetime
- Optimize service needs
- Avoid unexpected downtime

Get an alert on any equipment misuse, so that you can act.

Keep track of upcoming preventive maintenance needs based on equipment usage.

Get information on every delivery made and idle time per visit

Stay on top of performance

For fleet managers, HiConnect offers an immediate overview of your fleet's utilization. You can easily connect our API to an existing fleet management system. This way you get an overview of all your operations in one single place. Should someone borrow your equipment our API can be connected to their system as well.

CONTACT US TO FIND OUT HOW HICONNECT CAN MAKE YOUR OPERATIONS MORE EFFICIENT.

HOW IT WORKS:

Sensors gather data on when and how drivers and equipment are operating. Data is sent to and stored in a cloud service.

Data can be easily accessed by your computer or mobile device with real-time updates.

Users can see the location and status of their equipment and what their operators are doing. Especially beneficial for trailers.

The data is displayed in an easy-to-understand format, helping understand how equipment and operators are performing.

The data is then used to take action to improve safety, efficiency and productivity.

Fleet managers can see when equipment may need service and plan accordingly to minimize downtime.

HiConnect™ helps determine equipment utilization so resources are deployed more efficiently while minimizing fuel costs.
