

INSPECTION CONTRACT

The certificates of function you need

Make it simpler and easier on yourself to comply with inspection regulations for your equipment. With our thorough yet efficient Inspection service contract, timed to fit both your inspection and your work schedules, we get you back on the road fast.

Finding trouble – before it finds you

With Hiab ProCare™ Inspection, you can be sure your equipment meets the required standards as specified in national and local legislation. Yet, Inspection is about much more than legal compliance. It is also a proactive way of increasing the reliability of your equipment – protecting you from a number of potential unpleasant surprises. During our thorough evaluations, we will discover any potentially harmful flaw in your equipment, and correct it before it turns into a major problem.

Checkpoints, both visual and functional

We look into almost every nut and bolt of your load-handling equipment. Inspection comprises an extensive protocol with checkpoints and tests on your equipment's details and functions. The tests are divided into two main categories.

Visual check

Loader cranes

- Hydraulic system
- Stabiliser legs
- Crane base
- Column
- Outer and inner boom
- and all types of accessories such as hooks, jibs and winches

Demountables

- Hydraulic system
- Structural frames
- Hook arm
- Body locks
- Rollers
- Winch system
- Skiploader chains
- Rear stabilisers

Truck-mounted forklifts

- Engine
- Hydraulic system
- Steering and tyres
- Transmission
- Lubrication
- Electrics
- Mast
- Carriage
- Ancillary equipment

Functional check

- Proof-load test with nominal load if applicable
- Equipment's full and correct range of motion
- Control levers, or the remote control unit
- Intelligence system – meaning the overload protection and all other productivity or capacity boosting functions on your equipment
- Stabiliser leg safety functions, as well as add-ons such as winch and jib installations

Gain full confidence

Each of our authorised service centres and engineers have full technical support and service training and are audited on an annual basis. So you can be sure your equipment will meet the mandatory requirements as specified in national and local legislation. What easier way could there be to ensure trouble-free operations, more uptime and increased productivity – while fulfilling regulatory requirements?

Do you want clear proof of performance for your equipment? Ask us about Inspection.
